Final-year Computer Networks and Security student. Ex-Huawei Project Engineer Intern that leverage Python and PowerShell at Huawei to streamline 5G deployments. Seeking Network/Security or Solutions Engineering roles.

EDUCATION

Universiti Teknologi Malaysia, Johor

OCT 2022 - Present

- Bachelor Of Computer Science (Computer Networks and Security)
- CGPA : 3.90

HOBBIES/INTERESTS

- Badminton, running & hiking
- Team-oriented and community-minded

CERTIFICATIONS

- Google Cybersecurity Professional Certificate
- CCNA: Switching, Routing and Wireless Essentials
- CCNA: Enterprise Networking, Security, and Automation
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- CCNA: DevNet Associate Certification

SKILLS

- Cybersecurity & Networking:** Zero-Trust Architecture, SIEM Tools, Wireshark, Firewalls, VPN, VLANs, OSPF, Network Protocol Analysis.
- Programming & Scripting:** Python (Selenium, Pandas), PowerShell, C++, Java, SQL (MySQL), JavaScript (Node.js).
- Cloud & Infrastructure:** Oracle Cloud Infrastructure (OCI), Firebase, Linux, Git/GitHub, Cisco Packet Tracer.

LANGUAGES

- Mandarin (Native)
- English (Fluent)
- Malay (Fluent)

PROFESSIONAL EXPERIENCE

Huawei Technologies (Malaysia) Sdn. Bhd.

Project Engineer Intern (Delivery management Dept)

- Managed** resource allocation and daily movement for **100+ subcontractor teams** across the **Northern** and **Southern** Regions for the **U Mobile 5G Network Upgrade** (RAN & Microwave).
- Developed** and deployed **7 process automation** tools using Python (Selenium, Pandas) and PowerShell, reducing critical daily reporting time from 15 minutes to 1 minute.
- Facilitated** the official site handover process by **managing** and **submitting** over **1,000 User Acceptance Test (UAT)** and **Launch Completion Reports (LCR)** to the client.
- Navigated** complex **cross-functional coordination** between **Huawei, subcontractors, and clients** to resolve operational bottlenecks and site access delays.

GLOBAL EXPOSURE & HACKATHONS

Global Academic Visit: Singapore & Batam (UTM GO Global Programme, July 2023)

- Collaborated with **Universitas Internasional Batam (UIB)** and participated in innovation workshops.
- Gained industry insights at **DHL Asia Pacific Innovation Center** and enhanced cross-cultural skills.

Award-Winning Hackathons | Multiple Competitions (2025)

- UTM Hackathon Champion:** Developed "DevBoost AI," an emotion-sensing AI onboarding platform.
- UM Hackathon Finalist:** Engineered the blockchain-integrated "ZakatGo" automated payment platform.

SCHOOL PROJECTS

FYP - Zero-Trust Based Secure Online Examination System

- Designing and **implementing** a highly **secure, online assessment** platform grounded in **Zero-Trust architecture** to ensure academic integrity.
- Developing** the robust **backend infrastructure** utilizing Node.js and MySQL to **handle secure authentication** and **continuous verification protocols**.

Enterprise Network Solution for Sunray Construction & Interior Sdn Bhd

- Designed** and **configured** a secure enterprise network with **OSPF, VLANs, ACLs, Firewalls, VPN, and DHCP**.
- Tested and simulated the network using Cisco Packet Tracer.
